Customer Quote

"We had a mold issue that required replacement of a large section of sub-floor, drywall, trim work, and tile removal and installation. I've never been more satisfied with a contractor ..."

-Dave M.

Mold Remediation Services

RELIABLE | HIGH QUALITY | HONESTY | TRUSTWORTHY

Mold on your property is a problem that needs immediate attention and should never be ignored. Infestations pose serious health risks to anyone living or working in the environment along with structural and contents damage (furniture, carpets, etc.). You can be rest assured that Wright Restoration Services Inc. has a team of expert mold and remediation technicians ready to help you.

Our Mold Removal and Remediation Process

- Inspect and test for the presence of mold. This includes checking in areas where moisture and humidity exist, ventilation ducts, behind walls, in and under carpeting and other hidden areas of the structure.
- Comprehensive assessment to determine the extent of the mold infestation (both structural and contents) so our expert technicians may provide optimal remediation and removal protocols.
- Provide you with expert recommendations so when we complete the remediation, you may better control humidity levels in the structure to prevent future growth.
- Thorough deep cleaning and treatment of the affected areas according to industry standards and EPA-approved products.
- Property repairs and building renovations that were damaged by mold infestation.
- Environmentally safe products and practices are used as we thoroughly clean, disinfect and deodorize the area.

Wright Restoration Services Inc. is licensed, bonded, and insured. We are an IICRC Certified (Institute of Inspection, Cleaning and Restoration Certification) company and our technicians hold certifications in applied microbial remediation and mold removal. If you are looking for a highly rated mold removal and remediation expert, please call us now at 610-HELP-NOW and one of our team members will assist you further.
